

Zaragoza Beamer Theme

J.I. Montijano & T. Muñoz

University of Zaragoza
Spain

September 4, 2007

1 Use of the Zaragoza beamer theme

- ▢ Zaragoza beamer theme options

2 Control of the general color

3 Other title page

4 Customizing the theme

The theme is used in the standard way

```
 \usetheme[‘options’]{Zaragoza}
```

Several options are available:

- ❶ `showsections`
- ❷ `hidesections` (default)
- ❸ `height = <dimension>`
- ❹ `sidebar`
 - `width = <dimension>`
 - `left` (default if sidebar is set)
 - `right`

Example:

```
\usetheme[sidebar,left,width=1.8 cm]{Zaragoza}
```

How to change the color

The following macro is provided to change the color of the frames:

Changing the color

```
\tone{‘‘color’’}
```

For example the orders (written outside the frames)

```
\definecolor{mygreen}{rgb}{0.20, 0.40, 0.20}  
\tone{mygreen}
```

change the color of the following frames to myblue

Part II

Customizing the theme

If you don't like the background, you can “remove” it with

```
\setbeamertemplate{background}{} 
```

and you can recover it later with

```
\setbeamertemplate{background}[cylinder theme] 
```

Customizing the theme

If you don't like the footline, you can “remove” it with

```
\setbeamertemplate{footline}{}{}
```

and you can recover it later with

```
\setbeamertemplate{footline}[cylinder theme]
```

The option `[plain]` added to the frame eliminates almost everything in the frame
